

# JEWELLERY CARE RITUALS

Best Practiced After Each Wear

8

*tips for longer lasting jewellery*

*Put your Jewellery on last!*

Chemicals in deodorants, moisturisers, make-up and hair-spray can damage beaded jewellery.

1

*Allow perfumes to dry.*

Applying Perfume at least 10 minutes before adding your jewellery will restrict discolouration of porous beads.

2

*Remove jewellery before strenuous activities.*

A well-placed blow can shatter even the hardest gems. Use caution when gardening or playing sports, etc.

3

*Remove your Jewellery first!*

At the end of the day / evening remove your jewellery before showering or sleeping.

4

## *Tips for longer lasting Jewellery*

### *Regular Cleaning*

Wipe your jewellery with a soft cloth after each wear to remove dirt, grime, and body oils.

5

### *Avoid Liquids*

Including soaking in water, especially for jewellery pieces where stones or focal pieces are glued into position.

6

### *Special consideration when cleaning organic beads.*

Don't use ultrasonic cleaners, or harsh chemical solutions on natural and organic beads or other delicate jewellery pieces.

7

### *Store delicate pieces separately.*

Hard metals and gemstones may scratch or damage softer stones. Store delicate items in their individual jewellery pouch.
